

THE EDICT

INT ALUMNI NEWSLETTER

VOL 22: ISSUE 22 FEBRUARY, 2022

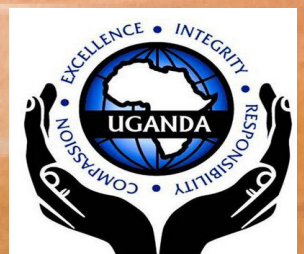

We would love to hear from you. Kindly send your contributions to the March, 2022 newsletter. Articles will be assessed on rolling basis, and should be 500-1500 words in length, including spaces. The deadline for submission of articles for the March, 2022 newsletter is Wednesday, 23rd February, 2022. Your feedback and suggestions are highly appreciated.

Please send all your submissions to intuganda@gmail.com. Title of Email: Newsletter Article Submission.

*Raymond D. Muwanguzi
INT/ Communications
Coordinator*

*Daphine Achiro
Communications Assistant*

*MARK KARAMIRA
MANAGING DIRECTOR,
SPE TAXI CAB*

1. How has INT transformed you?

INT came at a time in my professional life when I felt a little lost, frustrated and hopeless with the way I saw things working in Uganda.

Attending INT gave me a couple of things;

- (a). Much needed hope in the transformation of Uganda
- (b). A renewed sense of purpose in my area of calling
- (c). Awareness about the 7 Spheres of influence in which we all work
- (d). A Biblical world view to apply in my trade & passion
- (e). A rich global network of professionals with whom we are on the same journey to transform Africa

2. What are the key transformations in your profession?

I'm an entrepreneur currently operating in the transport sector, i continue to see a lot of 'crazy' things happening driven by technology and an insatiable hunger for innovation. Key among these are;

- Autonomous (self-driving) ground, air & water transportation: self/machine operated vehicles - Flying cars
- 'Green' (no-fossil fuel) transportation: electric cars, planes & boats/ships
- Internet of Things (IoT) in transport: transport systems seamlessly interconnected with & interdependent on various aspects of our lives e.g. professional/so-

cial schedules

- E-hailing: fast & easy way to access ondemand transportation with a click of your phone or watch, e.g. Uber.
- Ride-sharing: travellers sharing transport means along similar routes to de-congest the roads

3. What is the impact of these transformations?

With the speed at which technology is evolving and people innovating, the future is going to look very different very soon! All the innovations in the sector are driven by efficiency, speed & environmental conservation.

- (a). Efficiency: access goods & services easily as when you need them at the least possible cost (financial & energy cost)
- (b). Speed: Get from point A to B in the shortest possible time (e.g. with Hyper loop)
- (c). Environmental conservation: protect the environment as much as possible with minimal or no CO2 emissions

4. What do you enjoy most about your career/job?

I enjoy to create what didn't exist, solve problems and positively impact/transform lives in the process and my business allows me to do all this.

Even the sky isn't the limit of what is possible and that is exciting!

5. What is your favorite book?

“Good to Great” by Jim Collins. I read it through the INT Oak seed program and went on to study and apply it to transform my business journey.

6. What became of your INT project?

My INT project is Driver Training & Certification program which will produce the most professional drivers (individual & institutional) in Uganda & the region.
