

# INT PROJECTS

Introduction to Project Cycle  
Management (PCM) ..

# Session Objectives

1. Develop a case for projects as a means of expression of a paradigm shift; (taking responsibility, creating solutions)
2. Equip participants with the Problem Tree analysis tool for project design and conceptualisation

## Romans 4:17

- ...the God who gives life to the dead and calls things that are not as though they were

# Your National Transformational Individual project

Is that intervention that will  
create that thing/situation  
etc. that does not currently  
exist

# Isaiah 61: 1-3

1The Spirit of the Sovereign LORD is on me, because the LORD has anointed me to proclaim good news to the poor.

He has sent me to bind up the brokenhearted, to proclaim freedom for the captives and release from darkness for the prisoners, a

2to proclaim the year of the LORD's favor and the day of vengeance of our God, to comfort all who mourn,

# Isaiah 61:3

3 and provide for those who grieve in Zion—  
to bestow on them a crown of beauty  
instead of ashes,  
the oil of joy instead of mourning,  
and a garment of praise instead of a spirit of despair.

They will be called oaks of righteousness, a planting of  
the LORD for the display of his splendor.

# Oakseed

- It is already in you, put there by God
- Your project describes to the whole world what your seed looks like
- Your project give us a glimpse of what your Oak [tree] will look like and to whom it will give shade.
- Whether the seed develops into an Oak [tree] is completely in your hands
- It is not a matter of chance, it is a matter of choice.

# Why Projects? ..

- ..“Projects are **solutions to problems..**”
- A **channel** for the burden you develop. An action plan to “cement/ground” what we learn to action.
- To ignite peoples passion early and avoid waiting for “*in partial fulfillment of the award of*”.. syndrome.
- Consider growing our project to a bigger thing.. of your passion and purpose.
- Ongoing Project support shall be dependant on you. It will be “needs driven”;
- A **Problem Tree** is an aide that will be useful.

# **The Problem Tree and Logical Framework**

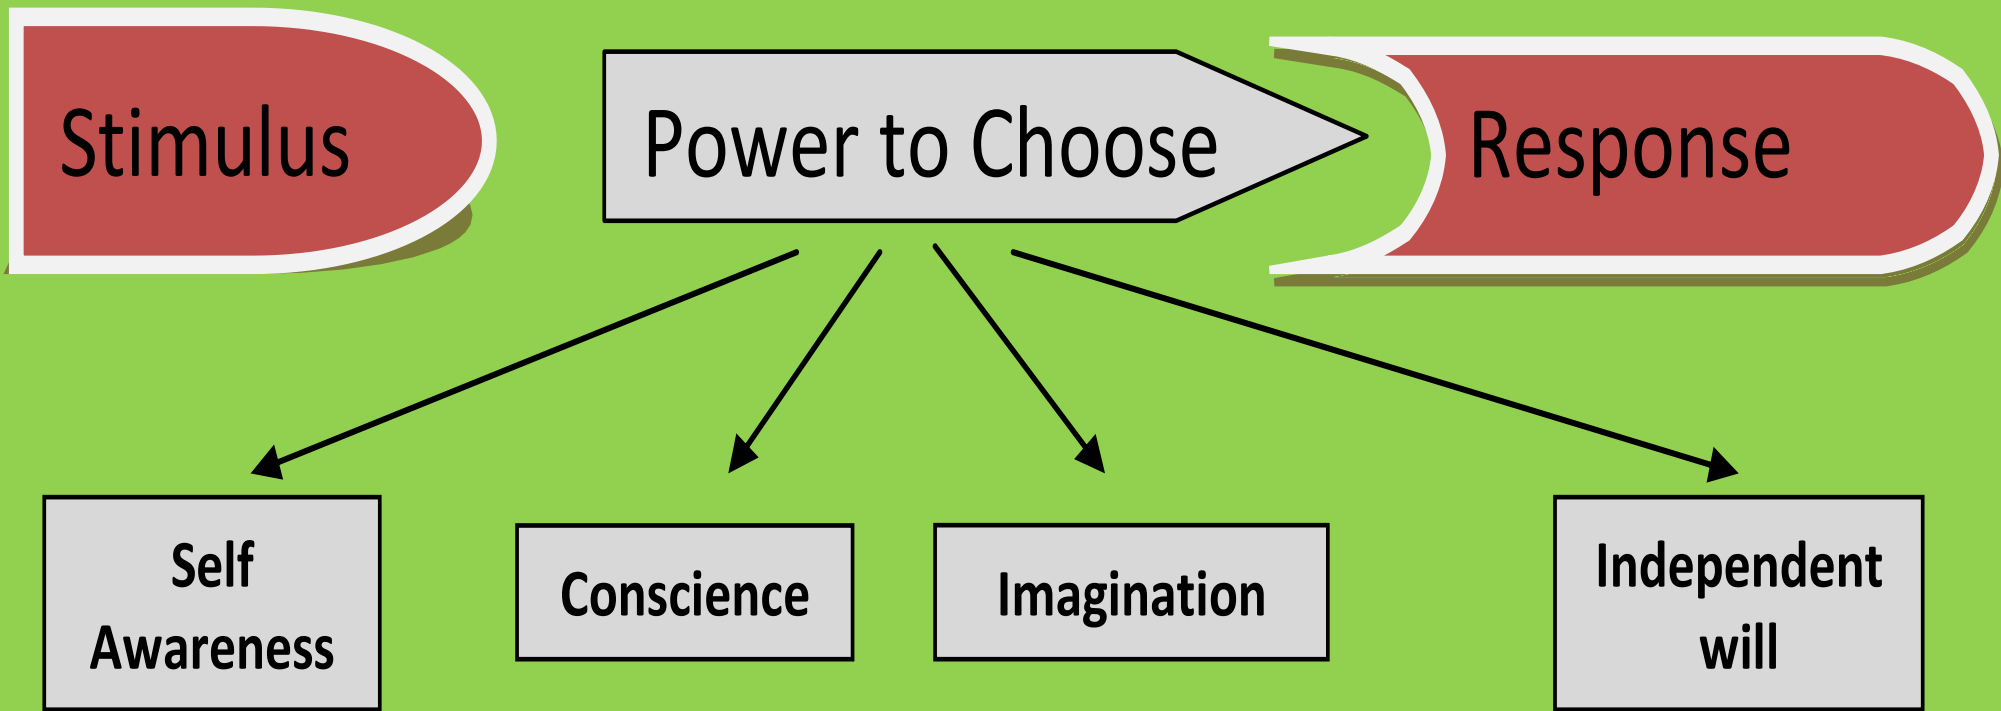

# Think point

1. Between Stimulus and Response is a space
2. In that space lies our ability to choose your response
3. In those choices lie your growth and happiness

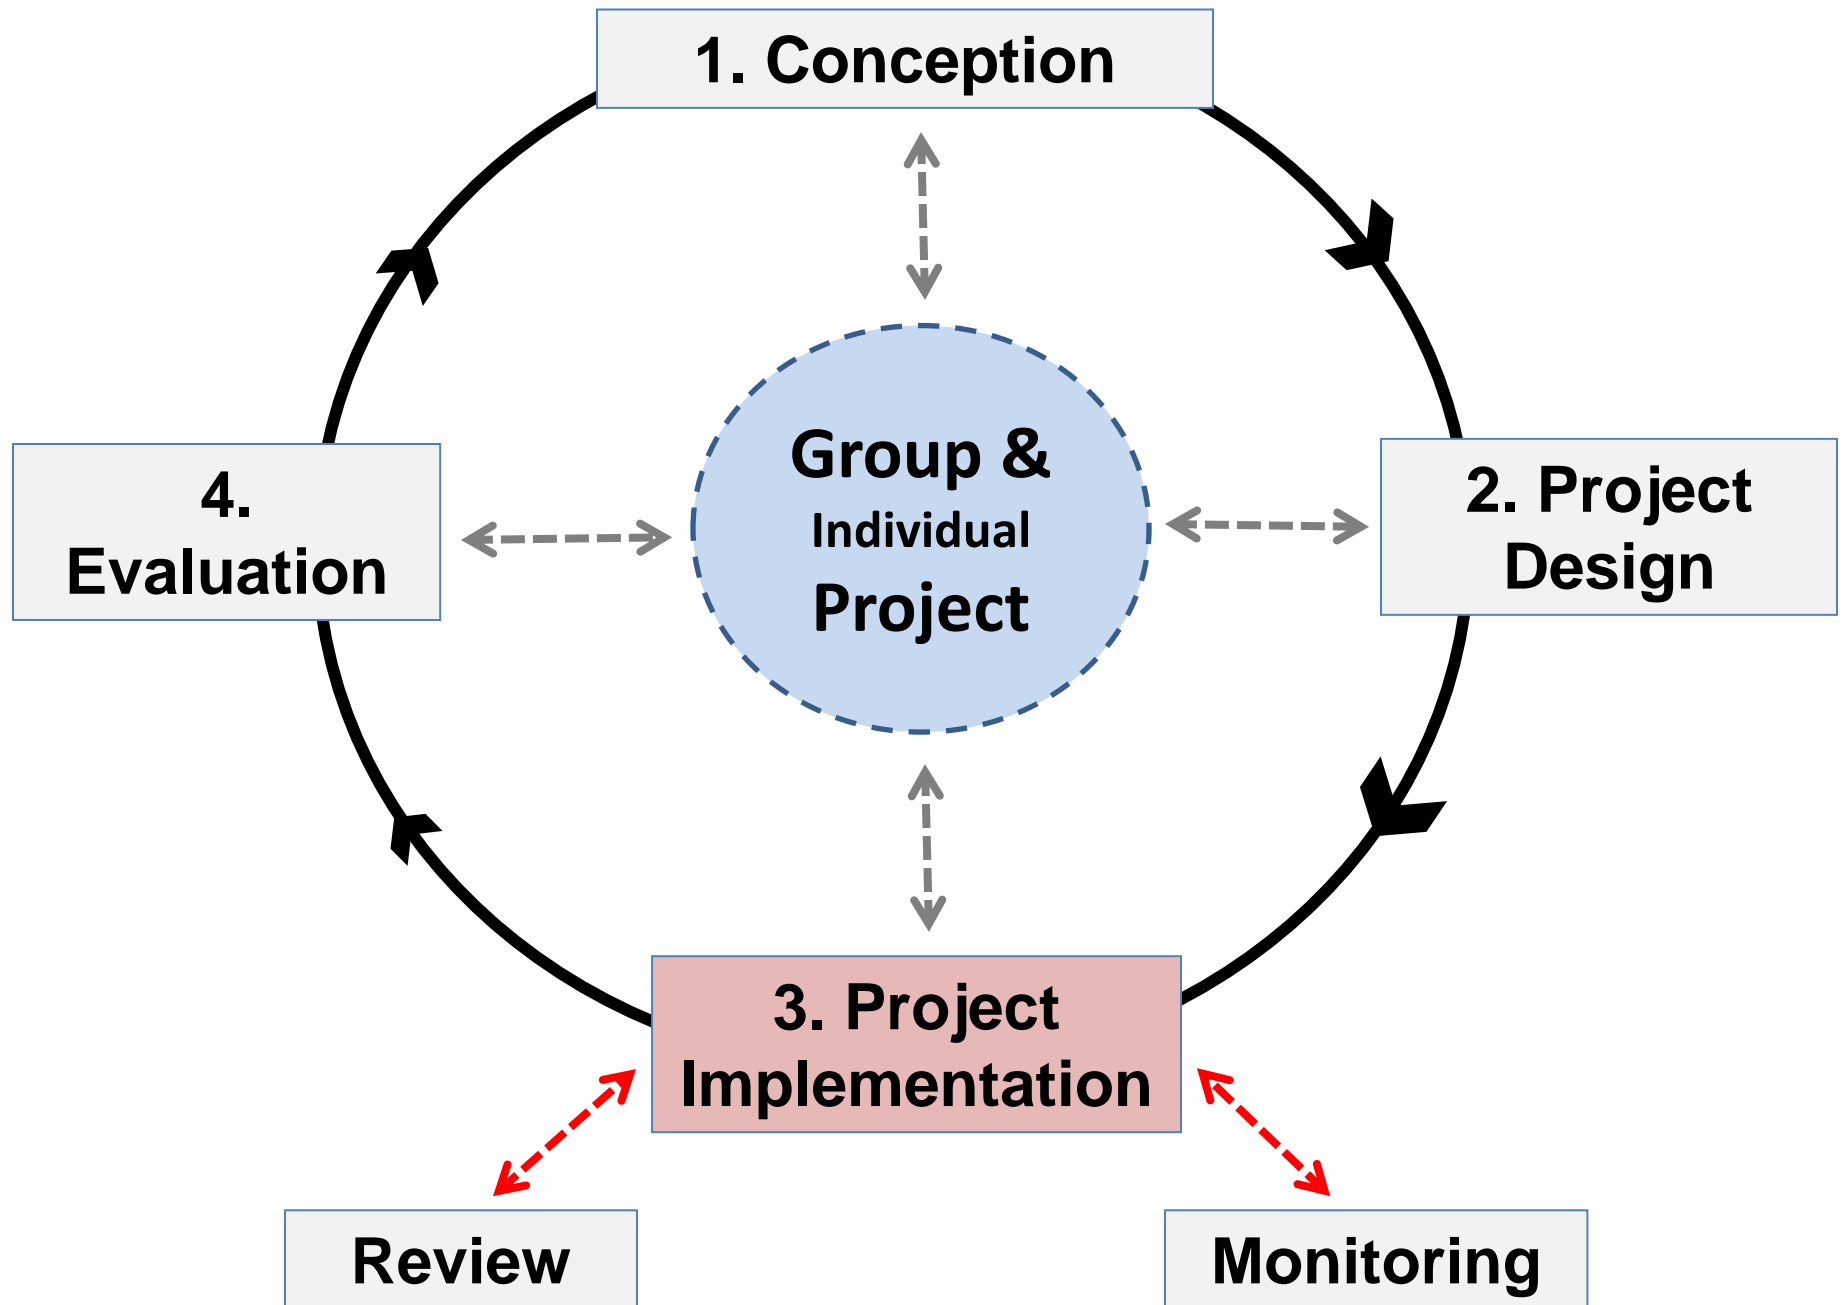

## Principles

- We are response-***able***
- Choice is a birth gift,
- What can we do about our situations (Mandela, Ghandi, Malcolm X;)

# The Power of Choice...

# The Project Cycle ...

# The Problem Tree - Concept

**2. Effects**

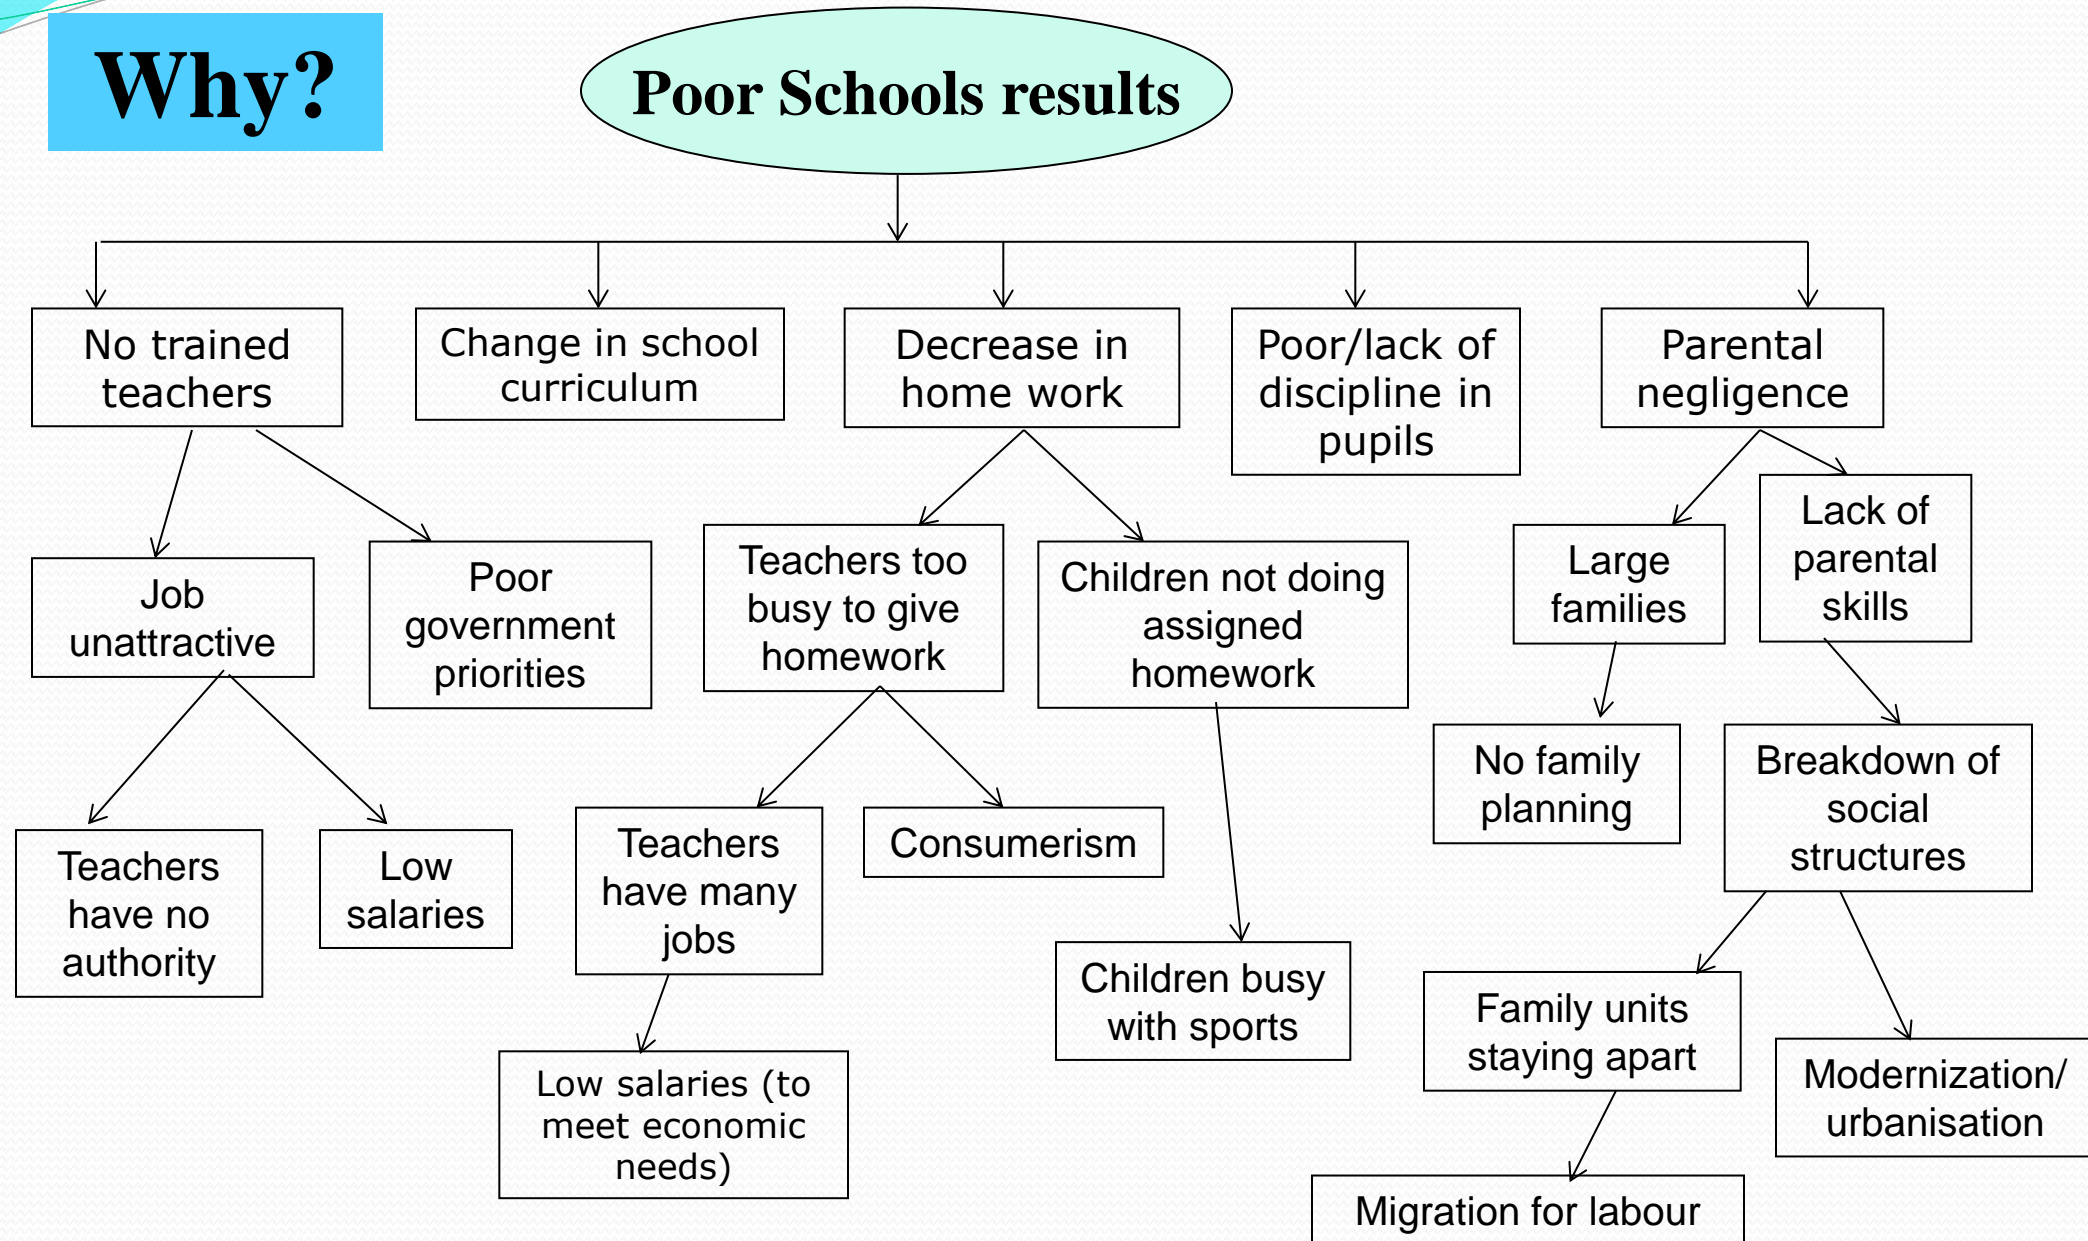

**1. Problem**

**3. Causes**

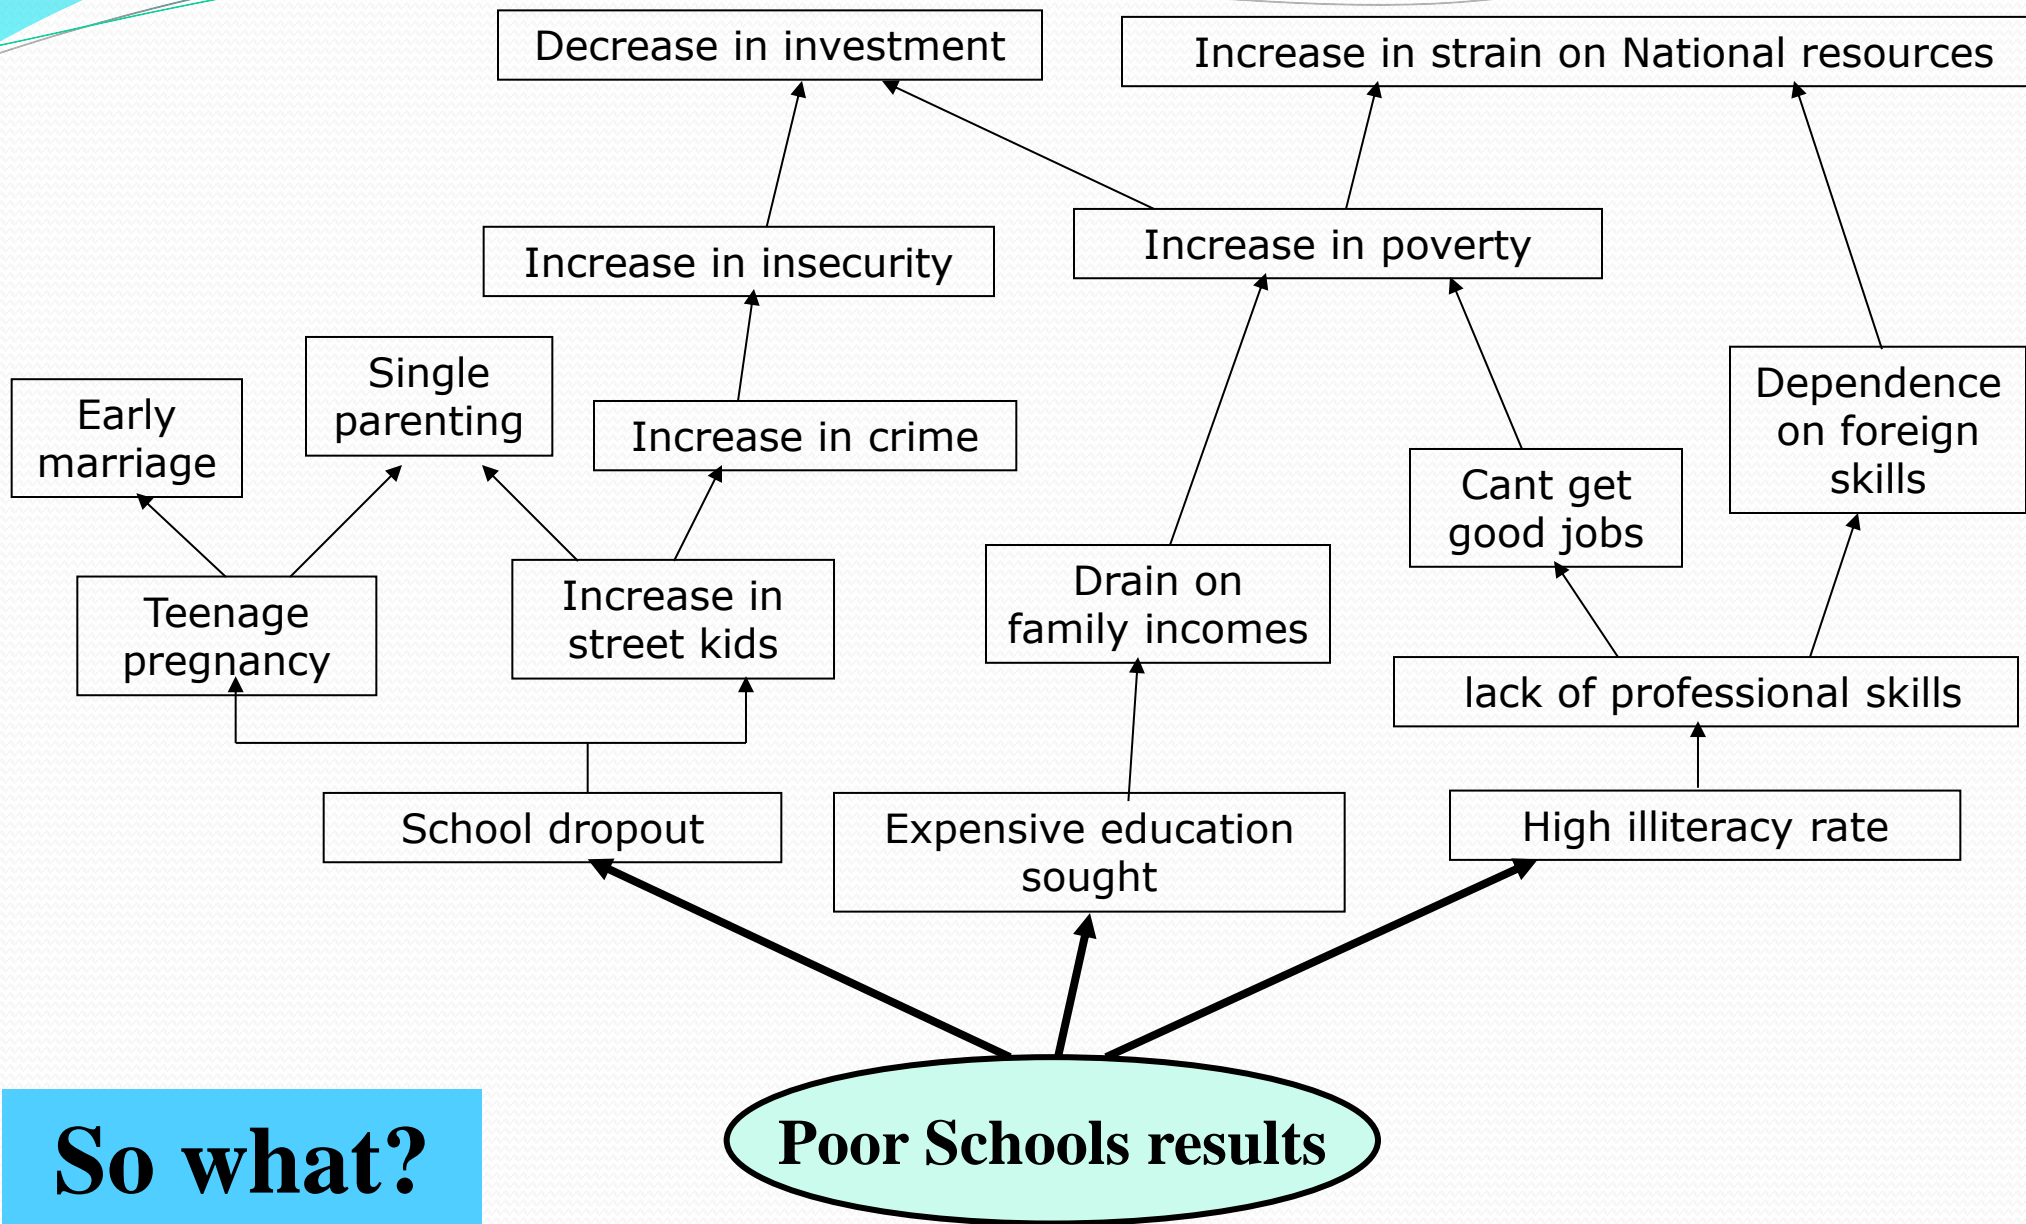

# WORKED OUT EXAMPLE – Identifying Causes

**Why?**

**Poor Schools results**

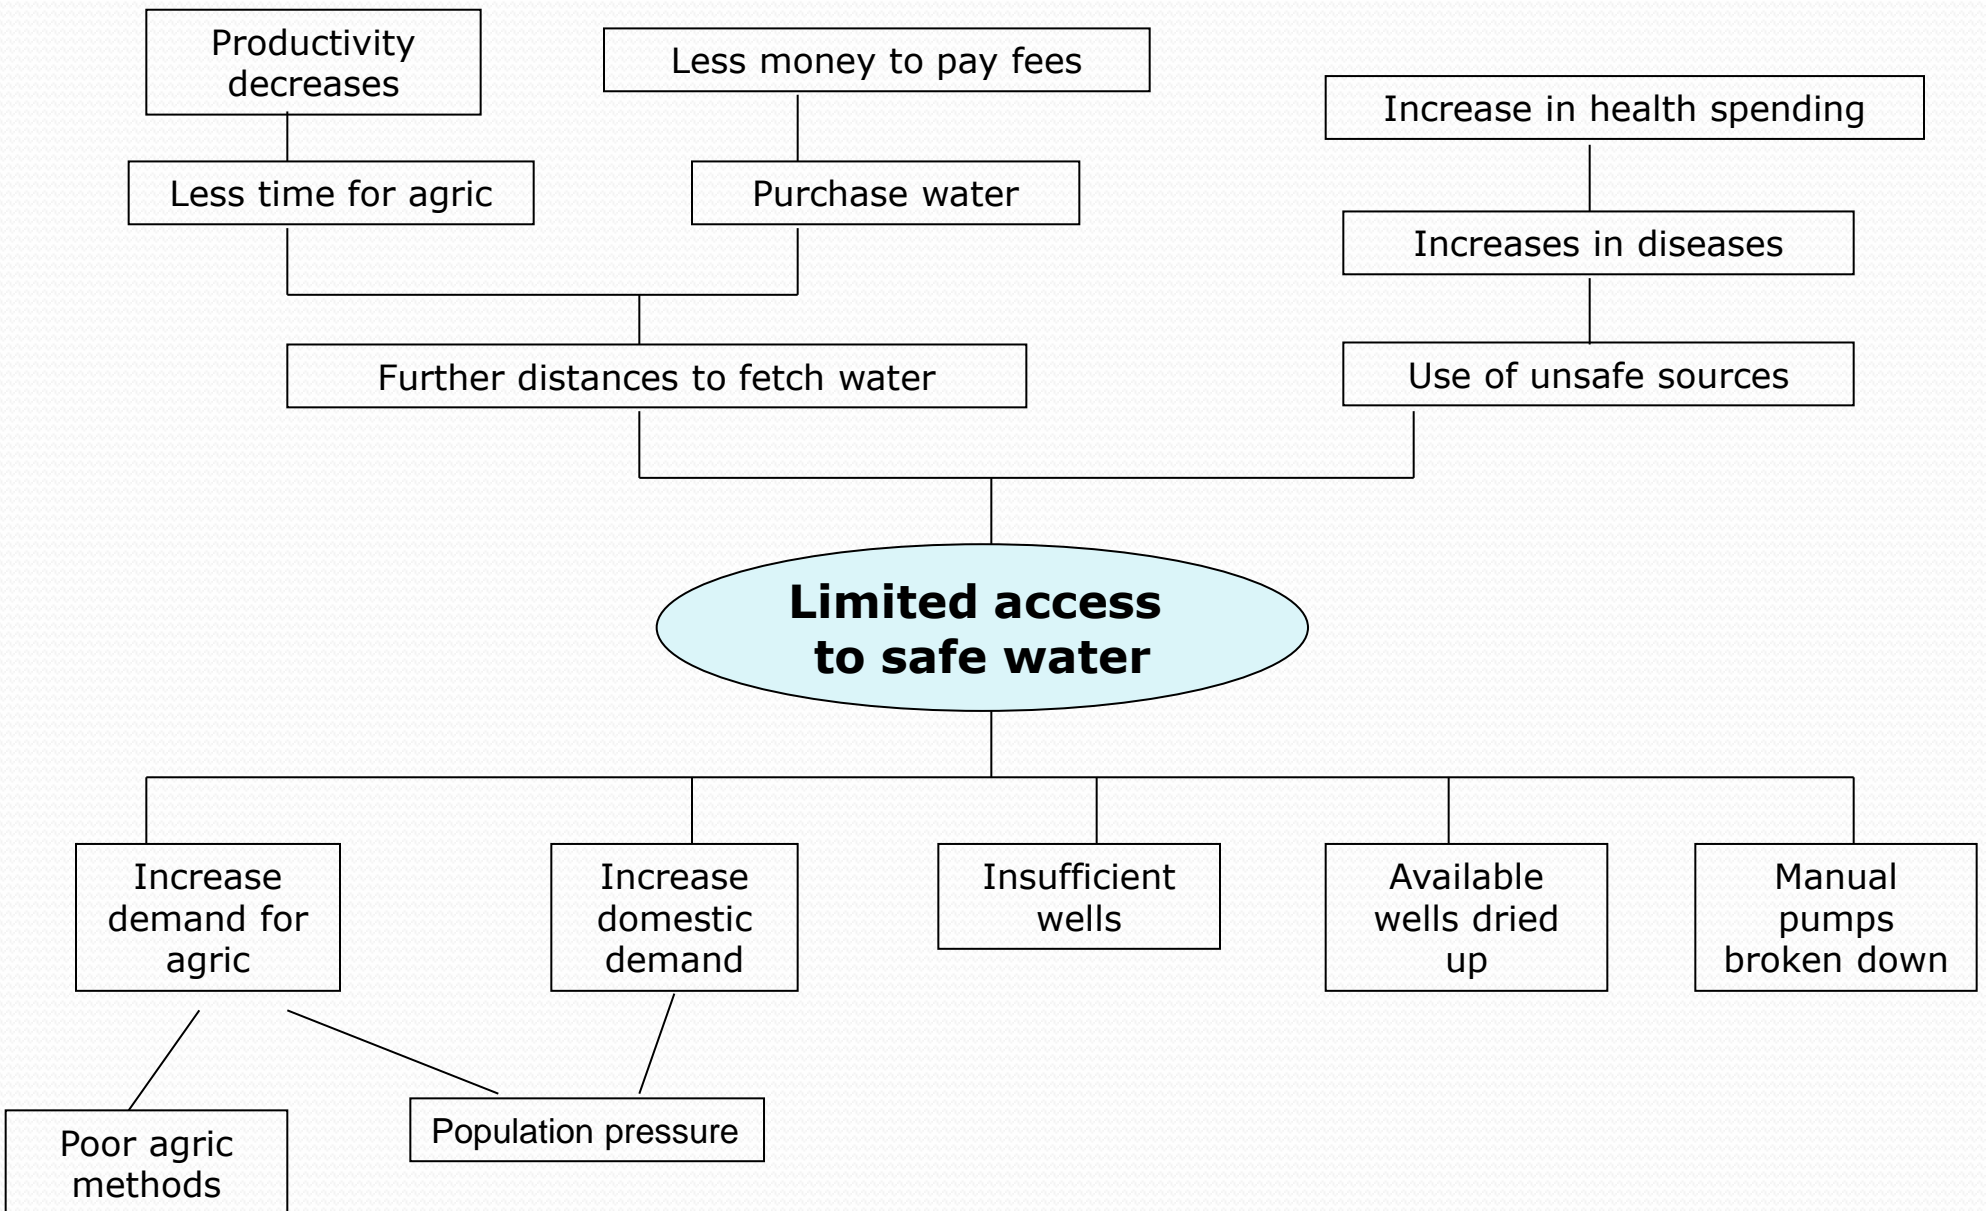

# EXAMPLE – Effects

**So what?**

**Poor Schools results**

# **EXAMPLE..** (Source Tearfund PCM Manual)

# Turning the Problem Tree into a Project

Problem

A problem stated positively becomes a Purpose – an end to which you are working. The reason for the intervention

**Purpose**

Causes 1

Causes have a hierarchy, some can become results while others activities.

**Results**

Causes 2

Select objectives based on what you can achieve within a timeframe and within your means and Strategic Plan and direction,

**Activities**

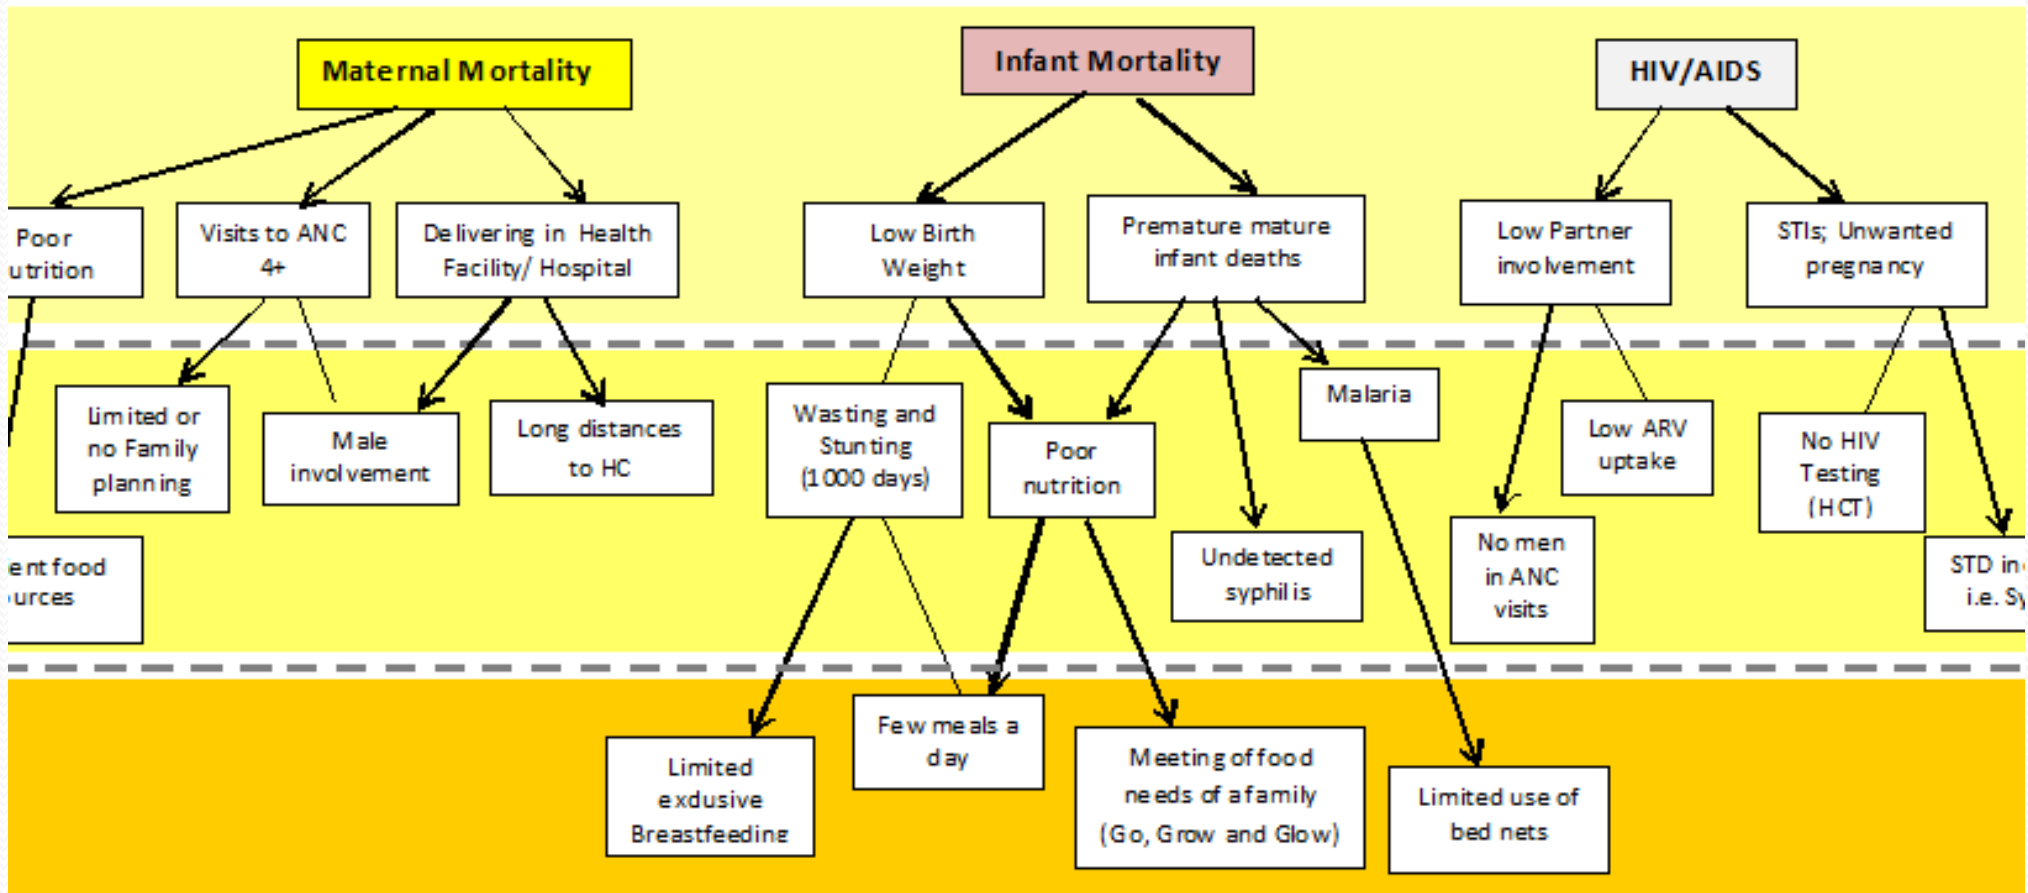

Effects

These identified ones are key in tracking the achievement of the Purpose.

**Indicators**

# **Key Terms and Definitions**

# GOALS

- A goal is the big picture of what you want the final outcome to be.
- A goal is much broader than objectives and activities
- A goal is related to the project need statement or the problem
- It must be simply stated.

# OBJECTIVES

- An objective is a performance measure
- An objective should be specific, concrete, measureable, and time Framed that would lead to achieving the goal.

# OBJECTIVES

- A goal may have a few or several objectives.
- Keep in mind the following when developing objectives:
  - ❖ Who/What/Where
  - ❖ Expected outcomes (results of activities)
  - ❖ Measures
  - ❖ Criteria for achieving the expected outcomes
  - ❖ Timeframe

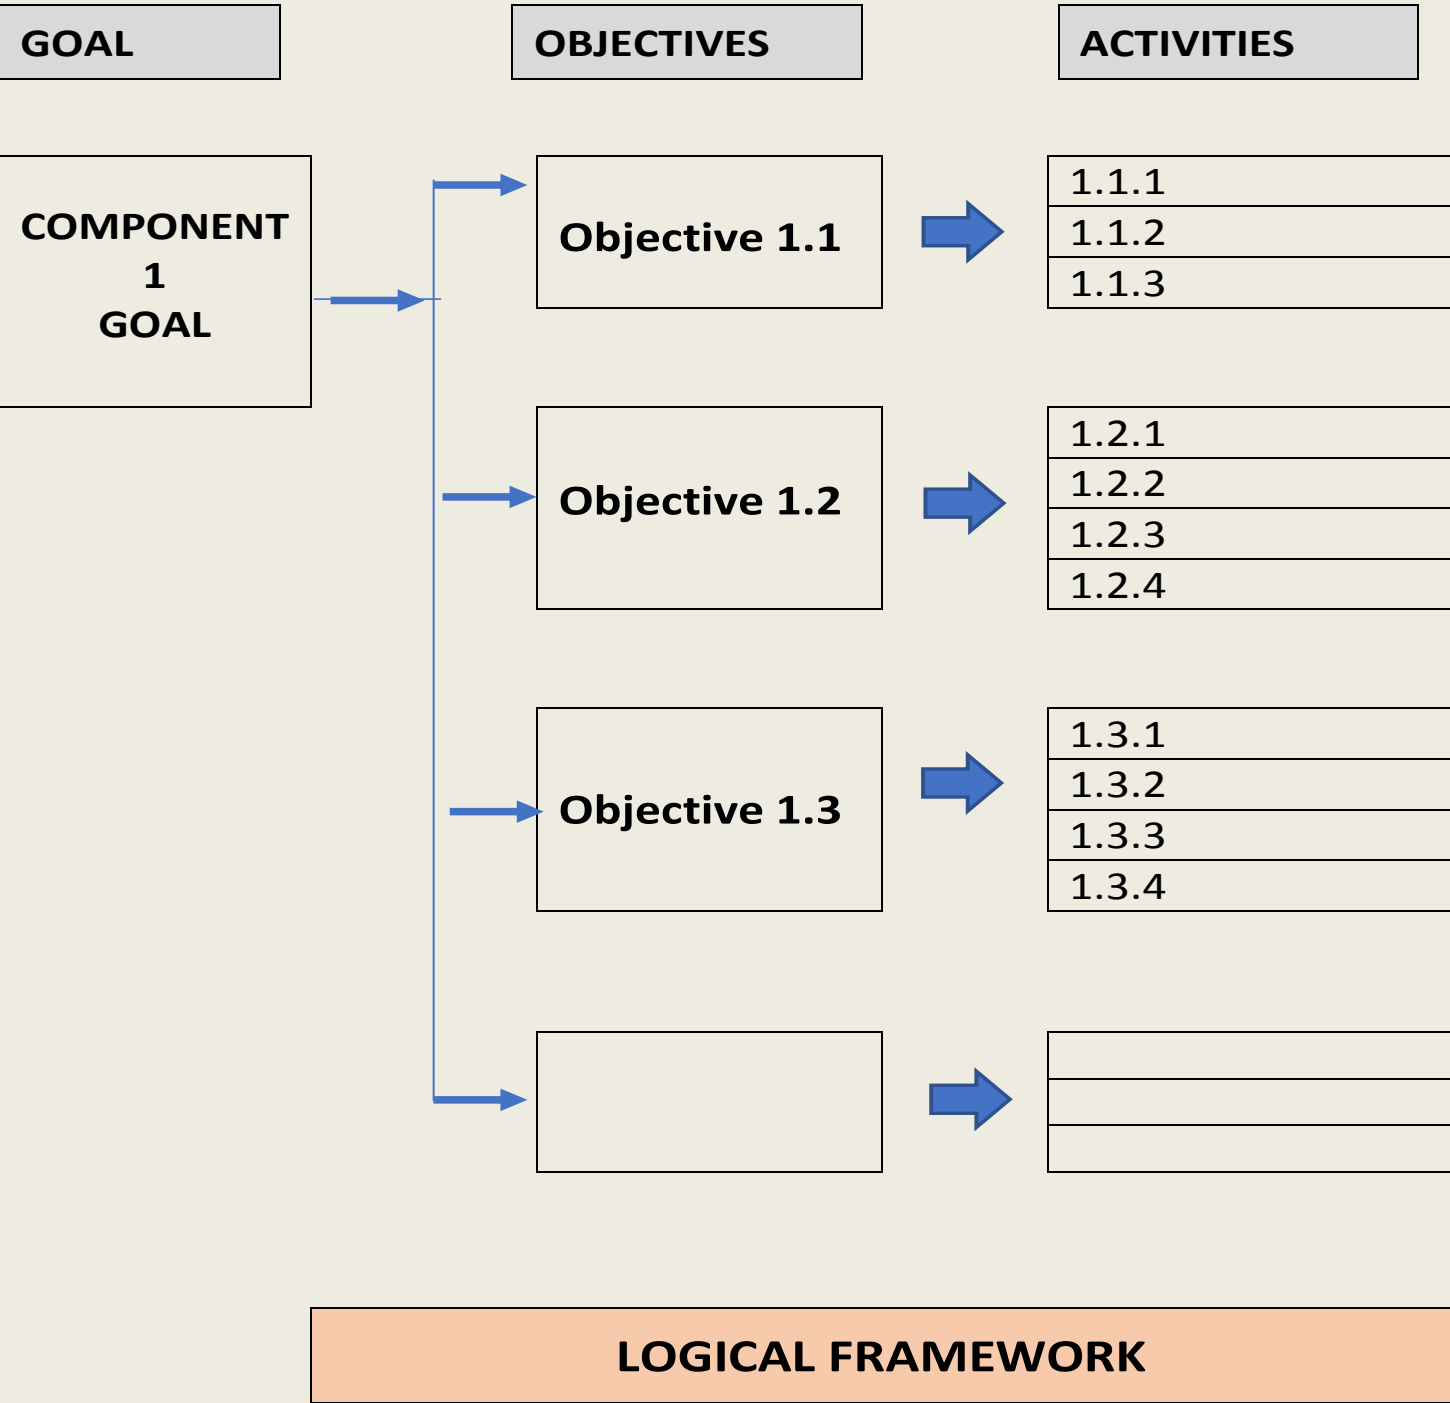

# ACTIVITIES

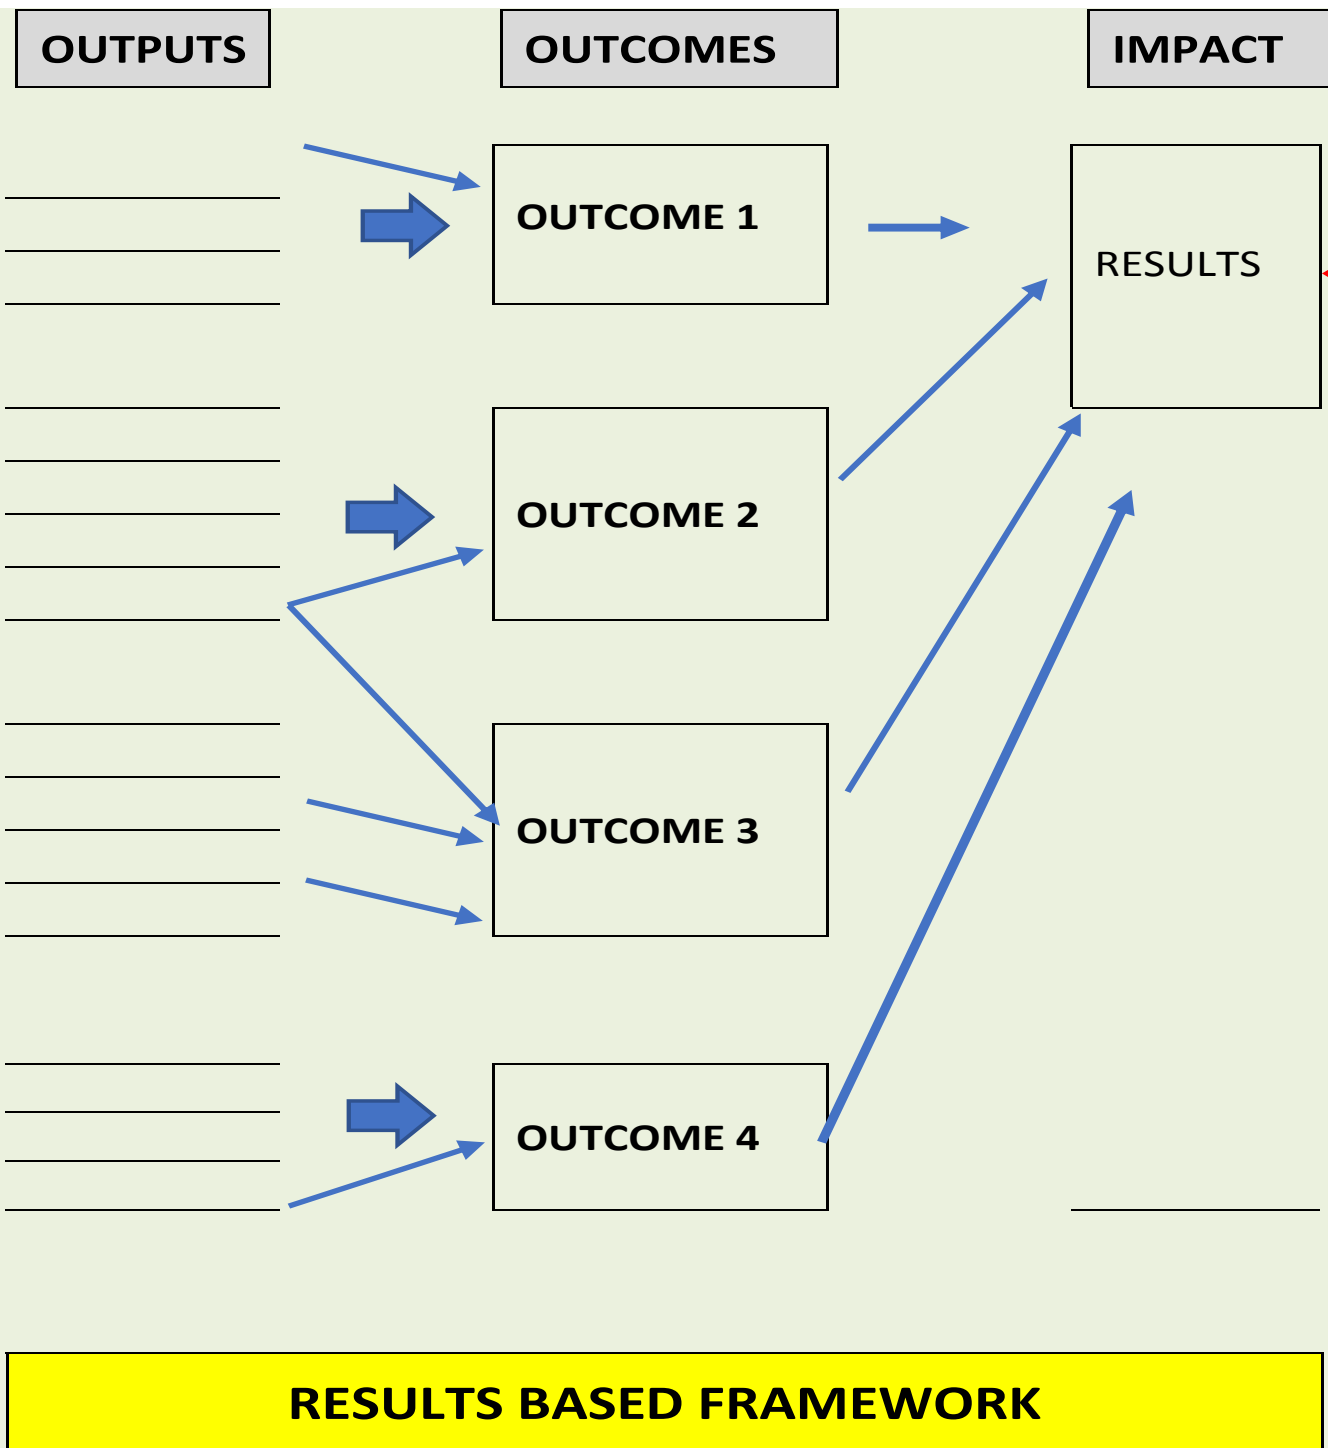

- Activities are the processes and actions that meet the objective.
- An objective can have one or multiple activities.
- Keep in mind the following when assigning activities:
  - ❖ What activities/events will be performed?
  - ❖ Are the activities reasonable to the objective
